A Personal Message From Orlando Harrison.

OWN YOUR HOME! I have been a fruit grower and nurseryman for thirty-eight years, and I cannot emphasize too strongly the importance to our nation of as many of our citizens as possible owning their homes—homes in the true sense of the word, away from the congested cities, out in the fresh air of the suburbs or country, and with a few acres of ground around them which can be cultivated and beautified.

If this country is to maintain its leadership among the nations of the world, the next generation must see many thousands of such homes, where children may grow, sound of mind and body—fit citizens and good Americans in every sense of the word!

For the young man who has learned to farm, twenty acres are not too much. For those who cannot afford so much land, or who have not the time to give it, a smaller tract will suffice. But every man should have some place which is his very own, where he can plant and care for trees, shrubs and ornamental plants—a place which year by year will grow more beautiful and attractive, and to which he can point with pride and pleasure as his own handiwork. Patience, industry and a little money are all that is required to create a home—and the rewards are rich and lasting.

Very truly yours,

ORLANDO HARRISON.

CONCORD—Ripens in early August. Fruit dark purple, almost black. Bunches of big berries, juicy, sweet, and delicious. Because of its extremely high merit, Concord has become the most popular grape in the country, and, taking the entire grape territory as a whole,

GRAPE VINES—(Continued)

more Concords are now in bearing than any other variety, nor does any other variety seem to succeed over such a wide range of territory in so many different soils. The vines are extremely strong growers and have sufficient vitality to overcome most of the troubles to which grape-vines are subject. The fruit matures early, ships well, and sells well.

MOORE'S EARLY—Ripens a little before the Concord. Very deep black, unusually large, and of extra-fine quality. The bunches are medium size, but are held together firmly. They stand handling and shipping unusually well and have an established reputation on all markets. Moore's Early is one of the most profitable varieties.

DELAWARE—Ripens a little later than Concord. Berries are deep red and carried in small, compact bunches; the skin is thin, but quite firm. The flesh is sweet and of the best quality.

NIAGARA—Ripens in late August. Leading white market variety. Bunches of berries large; color greenish white, changing to pale yellow when fully ripe. Bunches and berries large; excellent quality.
